WSI Government Lightning Services

WSI is an approved U.S. General Services Administration vendor, and through our GSA contract **GS-35F-5928H** fully supports the use of lightning products and services in the US Government and agencies.

The use of lightning in government agencies is widespread, ranging from aviation safety to fire management, military operations, and weather forecasting.

WSI's GSA Lightning Catalog includes a variety of products and decision support tools for real-time, near real-time, and archival data that are fundamental to the day-to-day operations of federal, state and local departments and organizations. Flexible licensing with regional to global coverage is provided.

This catalog is available to users on .gov and .mil domains only.
